

I stongly disagree with the limitatons imposed by HR 4026 on Satelllite Radio broadcasts. Thereis absolutely no rationale reason to consider legislation that impede the freedom of speech guaranteed under out constitution. Furthermore the passage of this bill would impede free and fair trade and create an anticompetative envirnment and an unequal playing field between traditional broadcasters and satellite radio broadcasters. I subscribe to Satelllite Radio currently and strongly object to any attempt to silence the service that I am paying for. It is providing a valuable community service and all of these points should far outweigh the broadcast industries attempt to create an anticompetative environment simply because they choose not to compete with Satelllite Radio effectively.
